

CORE OCCUPATIONAL M E D I C I N E

COVID-19 Return to Work Program via Telemedicine

What can we do?

- Immediate contact with a medical professional
- Return to work status once employee is symptom free and/or completed isolation period
- Single assessment center for consistent return to work evaluation
- Avoidance of unnecessary visits to clinics for screening and clearances.

How does it work:

- Call is received by one of our Occupational Health Professionals (OHP)
- OHP completes Return to Work COVID-19 assessment and discusses current employee status.
- OHP captures additional information if needed.
- OHP provides the employee and their employer an updated Return to Work status report via email.

Available 24/7/365
